PROFILE

Web developer based in Nablus who builds and runs real platforms end to end. Founder of Irtaq, a Quran memorization platform used by 2,500+ users in 10+ centers and adopted by the Nablus Directorate of Awqaf. Strong in React; hands-on backend experience with ASP.NET Core and Node.js; deploys with Docker, Linux and Cloudflare. Uses AI tools to ship faster, reviewing and testing every change.

EXPERIENCE

Founder & Lead Developer — Irtaq Quran Memorization Platform · irtaq.net · 2025 – Present

- Founded and lead development of a multi-tenant platform for Quran memorization centers, used by **2,500+ users across 10+ centers** in the Arab world, including Al-Bukhari Center in Nablus.
- **Officially adopted by the Nablus Directorate of Awqaf** for rollout to its Quran circles.
- Built the full front-end and most backend features (ASP.NET Core, SQL Server), with support from a senior backend engineer.
- Role-based dashboards for platform admins, center managers, teachers, students and parents.
- Features: attendance, exams and grading, memorization plans, reports with charts, and a certificate designer with QR verification.
- Arabic/English (RTL) interface, installable PWA, real-time updates with SignalR, push notifications with Firebase.
- Stack: React 19, Vite, Tailwind CSS, TanStack Query/Table, React Hook Form + Zod; deployed on Cloudflare Workers.

PROJECTS

Sandy Macramé — Full-Stack Website · Live site · 2025

- Catalog site for a handmade macramé business, with an admin panel for albums, images, reviews, FAQ and page content.
- Front-end: React, Tailwind CSS, Zustand, React Query, Framer Motion.
- Back-end: Node.js/Express REST API with MySQL (Knex migrations), JWT authentication, Cloudinary image uploads and email.
- AI chat assistant powered by Gemini through a server endpoint, so the API key never reaches the browser.
- Self-hosted with Docker Compose on a Linux VPS behind Cloudflare Tunnel.

SKILLS

- **Frontend:** React, JavaScript, HTML, CSS, Tailwind CSS, Material UI, TanStack Query, React Hook Form, Zod, i18n/RTL, PWA
- **Backend & Databases:** ASP.NET Core, Node.js/Express, REST APIs, SignalR, JWT, SQL Server, MySQL, Firebase
- **Deployment & Tools:** Git & GitHub, Docker, Linux, Cloudflare (Workers, Pages, Tunnel)
- **AI:** AI-assisted development (Claude Code), integrating LLM APIs (Gemini)

EDUCATION

B.Sc. Computer Information Systems — Al-Quds Open University · 2014 – 2018

CERTIFICATES

- Frontend Development with React — Training Program

LANGUAGES

Arabic (Native) · English (Very good)
